- **Web and App Development:** JavaScript, HTML, Tailwind CSS, Bootstrap, ,PHP, Dart, Flutter, React.js, Node.js, .Net
- **Design and Multimedia:** Canva, Adobe Photoshop, Macromedia Flash 8, Blender, Gimp
- **Databases:** MySQL, Oracle, Firebase
- **Tools and Software:** AutoCAD, TinkerCAD, TurboC++, VS Code

PROJECTS

T-shirt Website

A web application that allows users to browse and purchase T-shirts. The site includes features like shopping cart and payment integration.

Technologies Used: HTML, CSS, JavaScript, PHP, Bootstrap.

Book Website

An online platform where users can search, review, and purchase books from various categories. The site includes user authentication and payment integration.

Technologies Used: HTML, CSS, JavaScript, PHP, Bootstrap.

Agrobot App with Hardware

An IoT-based agricultural robot that automates tasks like soil monitoring, irrigation, and crop management. The app interfaces with the hardware to control robot operations, gather data, and monitor real-time performance.

Technologies Used: Flutter, Dart, Firebase, IoT Sensors, ESP32.

Mama's Kitchen App

A mobile application designed to provide a seamless shopping experience. Users can receive product recommendations, add items to the cart, and proceed to checkout.

Technologies Used: Flutter, Dart, API, Firebase, GetX.

Nature Thrills App

An immersive platform offering a curated collection of thrilling outdoor adventures, connecting users with nature's most exciting experiences.

Technologies Used: Flutter, Dart, Cubit.

Airtrekker App

A streamlined booking platform for adventure activities, enabling users to discover, book, and enjoy unforgettable journeys.

Technologies Used: Flutter, Dart.
